FRONT-END DEVELOPMENT
Self-Study

PERSONAL STATEMENT

I am a Front-End Engineer with more than 5 years of experience. I have worked on projects in different domains, including fintech and government services. I enjoy solving technical problems and learning new technologies. I always try to write clean, high-quality code and pay attention to details. I like working on modern and useful products that help people.

SKILLS

- » **Core:** HTML5, CSS3, SASS/SCSS, JavaScript (ES6+), TypeScript
- » **Frameworks & Libraries:** Vue.js, NuxtJS, React, Next.js, Angular, Pinia, Vue Query, Redux Toolkit, React Query, NextAuth
- » **UI Frameworks & Styling:** Tailwind CSS, Vuetify, MUI, shadcn/ui, PrimeVue
- » **Mobile Development:** Flutter, Dart, Provider, MobX, Firebase
- » **Tooling:** Webpack, Vite, Git, GitHub/GitLab, NPM, ESLint, Prettier.
- » **Architecture & Patterns:** Component-Based Architecture, Modular Architecture, Domain-Driven Design (DDD), Feature-Sliced Design (FSD), Monorepo, Micro-frontend
- » **Testing:** Jest, Vitest, Playwright, Cypress
- » **Back-End Integration:** RESTful APIs, WebSockets, JWT, OAuth

WORK EXPERIENCE

Dec 2024 – now

LEADING FRONT-END ENGINEER

Azerbaijan Credit Bureau / Baku, Azerbaijan (On-site)

At Azerbaijan Credit Bureau, I lead front-end development for a modular fintech management system using Nuxt.js, TypeScript, and a monorepo architecture. We follow Domain-Driven Design (DDD) and Feature-Sliced Design (FSD) principles to keep the codebase scalable, modular, and maintainable. I build reusable internal packages — including a custom UI library (based on shadcn/ui), shared utils, and icons — to support both admin and client applications. We're also laying the foundation for a future microfrontend architecture to enable independent module deployment.

Additionally, I maintain code quality standards across the team by configuring and enforcing strict ESLint rules integrated into our CI/CD pipeline.

Relevant Experience:

- Led front-end architecture for a modular fintech management system
- Built and maintained reusable UI components and internal packages (UI library, utils, icons)
- Applied DDD and modular architecture for maintainable, scalable code
- Worked in a monorepo environment with Nuxt.js and TypeScript
- Laid the foundation for a future microfrontend architecture
- Ensured consistent UI/UX across products using shadcn/ui-based design system

My technology stack:

» *HTML5, CSS3, TailwindCSS, **Nuxt 3, TypeScript, Vue, shadcn/ui, Pinia, Vue Query, Vite, Docker, Domain-Driven Design (DDD), Feature-Sliced Design (FSD), Monorepo, Gitlab CI/CD.***

Jul 2024 – Nov 2024

SENIOR FRONT-END ENGINEER (part-time)

Twój Lekarz / Warsaw, Poland (Remote)

At this company, I worked as the main Front-End Developer on a management system for a private medical center. The platform was developed using Vue.js, TypeScript, and a modular architecture based on Domain-Driven Design (DDD). The system included multiple core modules such as inventory management, calendar and appointment scheduling, patient visit tracking, income and expense reporting, and others

Relevant Experience:

- Built responsive, modular UIs for various medical center operations
- Developed core modules: inventory, calendar, patient visits, financial reports, etc.
- Applied DDD and modular architecture for maintainable, scalable code
- Maintained shared UI components and utilities across modules
- Collaborated with backend developers to ensure seamless data flow
- Set up and maintained ESLint for consistent, high-quality code

My technology stack:

» *HTML5, CSS3, SCSS, BEM, TailwindCSS, **TypeScript, Vue, Vuetify, Pinia, Vue Query, Vite, Docker, Domain-Driven Design (DDD), Gitlab CI/CD.***

Dec 2023 – Dec 2024

FRONT-END ENGINEER

ATL Tech / Baku, Azerbaijan (On-site)

At this company, I work as the main Front-End Developer on a database and management system for **"AzerEnerji JSC."** I use modern front-end technologies like Vue.js and TypeScript to build a fast, user-friendly application. The system was developed using a modular architecture and Domain-Driven Design (DDD) principles to ensure flexibility and scalability.

Relevant Experience:

- Built complex and responsive user interfaces
- Created real-time data visualizations
- Developed scalable, component-based front-end architecture
- Used Leaflet to map electrical lines and towers
- Integrated stable back-end connections for smooth data flow
- Followed modular architecture and DDD for clean code structure and future growth

Dec 2024 – Sep 2025 (part-time)

My technology stack:

» *HTML5, CSS3, SCSS, BEM, TailwindCSS, **TypeScript**, **Vue**, **Vuetify**, **Pinia**, **Vue Query**, **Vite**, **Docker**, **Domain-Driven Design (DDD)**, **Gitlab CI/CD**.*

Mar 2022 – Sep 2023

FRONT-END AND FLUTTER DEVELOPER

Freelancehunt.com (Freelance)

At Freelancehunt.com, I started working right away with the platform's top developer, Daniel Sonis.

This gave me the chance to join many different projects and use technologies like Vue, NuxtJS, React, and NextJS. I also continued working on mobile development using Flutter. It was a great experience that helped me improve my front-end and mobile skills.

My technology stack:

» *HTML5, CSS3, SCSS, BEM, TailwindCSS, **JavaScript**, **TypeScript**, **Vue**, **Nuxt.js**, **VueX**, **Pinia**, **Flutter**, **Dart**, **React**, **Next.js**, **Redux**, **React Query**,*

Jul 2020 – Feb 2022

FRONT-END AND FLUTTER DEVELOPER

Welligan / Odessa, Ukraine (Remote)

As a Front-End and Flutter Developer at Welligan, I have successfully completed over 10 projects. My work included web layout, web app development, admin panel creation, and mobile app development with Flutter. These projects helped me grow my skills and work with different technologies and tasks.

My technology stack:

» *HTML5, CSS3, SCSS, BEM, Bootstrap, **JavaScript**, **TypeScript**, **Gulp**, **Webpack**, **Angular**, **RxJS**, **Flutter**, **Dart**, **Provider**, **MobX**, **Firebase**.*
